FAA-99-5483-68

Subject: 180 day Reserve Pack Cycle

Dear Sir,

I just heard that the FAA is considering revising the reserve pack cycle from

120 days to 180 days. I have been skydiving for 30 years with 11,900 jumps.

I have seen the quality and workmanship of parachutes and parachute rigs evolve

to be top notch. I whole heartedly believe that the pack cycle should be increased

to 180 days but for equipment that is less than ten years old.

Sincerely,

Carolyn S. Clay, D-3347
